

In March 2020 Finning were visited by 8 students as part of our efforts to celebrate International Women's Day and as a part of our wider efforts to ensure that we create a culture of inclusiveness for everyone. The students arrived early and were led through our Head Office in Cannock, taken on a tour through our workshops and had a chance to talk with various members of staff – followed by a 'speed networking' session where each student had 3 minutes to ask questions on a 1-on-1 basis to various members of our workforce, before rotating to the next person. We wanted to show that women are valued equally at Finning and that a career in Engineering can be for anybody – the students were great fun and we look forward to continuing our relationship with Cheslyn Hay

WAT North Careers Fair 2021

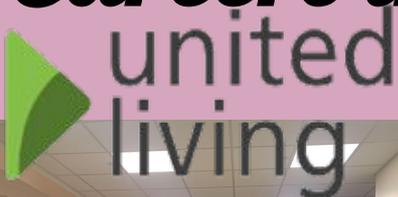

The careers fair really helped to engage with young people and give them an insight in to the range of opportunities available within the logistics industry. The world of work is ever changing and it is important that organisations do more to inspire and attract young people to build sustainable business for the future.

The students throughout years 9-13 were very engaged and asked lots of questions in order to gain more information on the options available to them through The Royal Wolverhampton NHS Trusts Apprenticeship programme. The students had great career aspirations and on behalf of the Trust I would like to wish them all every success in their future careers.

Careers in the curriculum 2022

*Cheslyn Hay Park March 2022
Year 12 & 13 Construction*

*McArthur Glen February 2022
Year 9, 10 & 11 Business Studies*

new homes

This further provided me with a real life experience and knowledge around how sites are set up as you are provided with a visual construction of the site allowing for a more in depth ability to learn.

The visit was really useful to our students, allowing them to put all the theory they have covered, into a more practical setting. Seeing what a site manager does on a day to day basis and the importance of managing complex projects has also enthused the learners in their own project management assignment and this is already starting to show in their own project work since the visit. Learners benefitted from talking to people that work within the construction industry cementing for some their options to seek apprenticeships or go onto degree courses in construction related roles.

Thanks to McLaren for providing the PPE to support these visits

The West Midlands has a thriving business scene and we were delighted to work with Cheslyn Hay Academy recently to deliver a business insight talk to give an overview of the McArthurGlen Group and our newest destination, McArthurGlen West Midlands. It was fantastic to be invited and excellent to be a part of such an engaging session with the Year 9, 10 and 11 pupils who will ultimately be the leaders and entrepreneurs of the future.
